part on severe tailored gowns. Gold, silver, enamel, rhinestones and sometimes real jewels are being used.

The smart gown illustrated is of dotted taffeta silk. The skirt is box platted, and just above the knees the plaits flare out and a knife platted fan is inserted. Holding the box plaits in place are embroid red designs worked in silk and a rounded pattern done in braid.

SARTORIAL TRIFLES.

Jewelers say that one of the most salable of their novelties just now is a garter buckle in the shape of a locket which opens and discloses either the picture of one's flance or some cherished friend or relative. These buckles are favorite bridesmald gifts at smart spring weddings and in duli Roman gold are very handsome.

Wash silk petticoats are to be worn with dainty summer dresses. A charm-ing model is of white liberty silk trimmed with two graduating flounces of accordion plaiting in which insertions of lace are inset.

Accordion plaited skirt flounces are not possible to launder, and where a skirt is to be "tubbed" they should be

A sensible as well as pretty way to make a wash silk petticoat is to trim it with a deep gathered flounce of the material edged with a ruffle of three

MILLINERY NOTES.

On a small, piquant face and with a beautifully neat coiffure the small hats of the season are very fetching, but the majority of women have to be careful how they adopt millinery of this kind. Modifications both in the tilt and in the height of the bandeau will have to be employed and the width of the brim graduated in accordance with the shape of the head

and the manner in which the hair is arranged for these shapes to be successfully worn

These small hats should not be overtrimmed. Indeed, a few bunches of flowers where the brim curves or a rosette or so of ribbon is sufficient.

A delightful little morning hat is a close fitting turban in two shades of brown straw, with a little piping of brown velvet. A knot of velvet appears in the front of the model, which is tilted with a rather exaggerated incline over the eyes. Two shaded brown feathers at the back come low on the

As the season advances there will be an attempt to revive the mushroom shape in a small size, trimmed with a folded scarf of embroidered gauze or fine lawn and a high bandeau of dark colored ribbon or velvet.

About the low crown is a twist of shaded green and rose ribbon, which ties in two smart bows at the side of the hat where it is slightly indented.

> STYLES FOR WEE FOLKS. The tub frock for "very best" wear is of openwork embroidery for tots of from three to six or seven years. They are made with a long bodice and short standing out skirts. A noticeable model designed for girls from six to ten years is arranged with the dearest little directoire coat of fine linen over an

underdress of filmsy embroidered muslin, with soft falling collar and sleeve ruffles of embroidery.

Sleeves in juvenile modes are as startling in their development as in the new grownup gowns. For coats they are large picturesque affairs, with the fullness at the top all gathered into the seams. This sleeve stamps a model as of the hour.

On frocks the elbow puff sleeve is carrying all before it, and short sleeves and slightly decollete necks are coming into vogue for baby girls.

In hats there is a strong feeling for bonnets of the most fascinating description.

A tuscan model, for example, is in a sunburnt tint, wreathed with roses and raised off the face by a bandeau that WANTED-A GIRL FOR GENERAL is softly ruffled with pink chiffon.

The little manikin this spring will wear the comfortable loose coat of the Russian blouse style in pale blue cloth, belted with a white kid band and arranged with three shoulder capes, crowned by a Napoleon hat of blue

The dainty costume in the cut is a directoire frock for a tot of seven years. A dainty little tricorne hat of white chip trimmed with slightly curled ostrich tips is the smart piece of headgear that goes with the dress.

A WOMAN TO BE PRETTY

Must Have Luxuriant and Glossy Hair, No Matter What Color.

The finest contour of a female face, the sweetest smile of a female mouth, loses something if the head is crowned with scant hair. Scant and falling hair, it is now known, is caused by a parasite that burrows into the scalp to the root of the hair, where it saps the vitality. The lit-tle white scales the germ throws up in burrowing are called dandruff. To cure dandruff permanently, then, and to stop falling hair, that germ must be killed. Newbro's Herpicide, an entirely new re-sult of the chemical laboratory destroys the dandruff germ, and, of course, stops the falling hair, and prevents baldness. Sold by leading druggists.
